

STOP FUNDING CLIMATE CHAOS DEMONSTATION

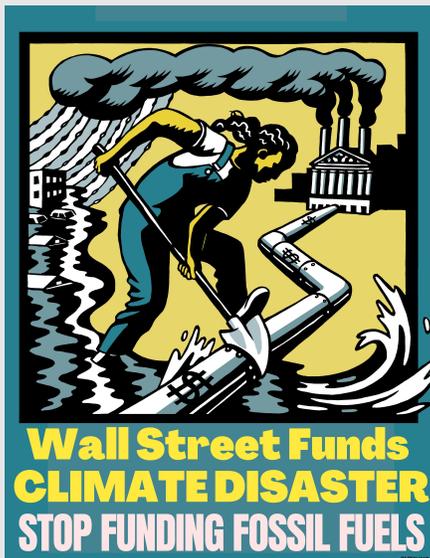

Friday, October 14, 2022

4:15 - 5:15

Academy Park across from Capital Building in Albany

demonstration to draw urgent attention to the
moral imperative to stop funding new fossil fuel projects

For too long, the financial services sector has enabled the world's fossil fuel addiction. It is now time for financial service providers to accelerate the shift to renewables. The scientific and moral imperative is clear: there must be no new investment in fossil fuel expansion, including production, infrastructure and exploration. - António Guterres, UN Secretary-General

This action is to speak to Big Finance on the moral imperative to stop funding fossil fuel projects... it is directed at TD Bank, which continues to finance new fossil fuel infrastructure with billions of dollars, all while science is telling us to reverse course immediately to prevent climate catastrophe.

We are bringing faith leaders to the forefront of this gathering to highlight the immorality of investments that steal the future from coming generations.
