# STOP FUNDING CLIMATE CHAOS

## DEMONSTRATION

Friday, October 14, 2022  
4:15 - 5:15

Academy Park across from  
Capital Building in Albany

demonstration to draw urgent attention to the moral imperative to stop funding new fossil fuel projects

[please RSVP](#)

For too long, the financial services sector has enabled the world's fossil fuel addiction. It is now time for financial service providers to accelerate the shift to renewables. The scientific and moral imperative is clear: there must be no new investment in fossil fuel expansion, including production, infrastructure and exploration.  
- António Guterres, UN Secretary-General.

## Wall Street Funds CLIMATE DISASTER STOP FUNDING FOSSIL FUELS

This action is to speak to Big Finance on the moral imperative to stop funding fossil fuel projects... it is directed at TD Bank, which continues to finance new fossil fuel infrastructure with billions of dollars, all while science is telling us to reverse course immediately to prevent climate catastrophe.

**STOP THE MONEY PIPELINE TO CLIMATE DESTRUCTION**

Turning off the money pipeline is one of the most effective ways to decrease the input of greenhouse gases into the environment.

We are bringing faith leaders to the forefront of this gathering to highlight the immorality of investments that steal the future from coming generations.

**Why TD Bank?** - because it is symbolic of 'Big Finance' and the environmental calamities associated with their investments in fossil fuel excavation, production and distribution. **TD Bank** is one of the largest bankers of [tar sands projects](#) and the [Trans Mountain Pipeline \(TMX\)](#) in Canada.
